

STONY PLAIN SUN.

VOLUME ELEVEN.

STONY PLAIN, ALBERTA, THURSDAY, OCT. 9, 1930.

Whole Number 531

Potato Growers Have Good Market Ahead.

Reports from east and west indicate that for the Dominion the yield of potatoes this season will be under the average, due largely to unfavorable returns in the east, especially in the province of Quebec, where the yield will be cut about fifty per cent, owing to rust and mildew. In fact, taking Canada as a whole the provinces of Alberta and Manitoba are the only ones which have a normal crop, says The Market Examiner.

The acreage this year is larger in Alberta, and the high winds which played havoc with many of the grain fields did not of course as adversely affect the potatoes.

It is expected there will be a surplus to dispose of from this province, and, with British Columbia promising a short crop, there will not be as many potatoes shipped from over the mountains as usual.

Growers and shippers will have to bear in mind that when we are marketing outside the province that the buyers will be somewhat fussy about the grading. A great deal of business has been lost to Alberta growers because the home grown offerings did not present as attractive an appearance on the retail counters as did those from outside the province.

Notwithstanding a surplus in Alberta and a short crop in B.C., growers and shippers should remember that there will still be many buyers who will be willing to pay a little more for potatoes which present the best appearance.

Town Planning in Alberta. Article 5.

Regulations prepared by the Provincial Town and Rural Planning advisory board and now made effective by order-in-council should not only directly benefit the rural areas of the province, especially in years to come, but will be appreciated by city and town dwellers and by the ever-increasing number of tourists.

We read of the struggles to maintain scenic attractiveness on the highways, in many of the States in the country to the south of us, which has for several decades been conscious of the signboard menace.

In Canada we have been, more fortunate, and before population becomes too great or development too intense, several provinces are already operating under regulations in regard to outdoor advertising.

The Alberta Regulations—applying only outside cities, towns and villages—with exceptions for official highway signs or directional signs, are to the effect that—

Signs shall be erected only within two miles of any city or town; shall not be closer than 500 feet to each other; shall not be erected closer than 500 feet to road intersections or railway crossings; and shall not be erected closer to the center line of the highway than 160 feet.

Even where otherwise permitted in such limited zones, signs must be omitted that in any way might constitute a traffic hazard, might obstruct desirable views, or be objectionable to nearby residents.

Every sign is to bear a label showing the name of the owner or person responsible, and must be licensed for the calendar year on application to the Director of Town Planning, Parliament Bldg., Edmonton.

Left for the South.

Mr and Mrs J F Kimmerley and Mr and Mrs Lloyd Kimmerley left Stony Oct. 2 by motor, for a trip back to their old home town in Tennessee, calling at a number of places en route where they have friends. Altho Mr Kimmerley sold out his farming interests here, he has expressed his intention of coming back here in the spring, and will probably take up land in Holborn district.

Threshing Operations.

Threshing operations continued this week, in nearby districts, after the many tie-ups which have been experienced this fall. With a few exceptions the fields are fairly well cleaned up from the stacks, stacking being done where the machines were not available. The good spell of weather last week gave the threshers a chance to get in some good work. Those farmers who held off and had their grain threshed in the good spell of weather, have no fear of the "damp" test when they bring their grain to the elevator.

Pommes de Terre and Spuds

The slowing down of threshing operations on some farms having allowed the farmers to attend to other seasonal matters, the harvesting of good spuds for which this district is noted, has commenced; and on some of the recent days processions of potato-laden wagons have been wending their way to Alberta's potato headquarters—Stony Plain.

Hardwick's, which has always specialised in high-quality produce, has had a busy fortnight, its potato squad working overtime. This store has already shipped a number of cars, with several others on order.

Altho the majority of spud receipts here are of the usual high quality, in some few cases potato raisers have not exercised the necessary care to see that only good, sound ones get in the bag.

Inspector Henderson of the Dept. of Agriculture, is giving this point a close supervision.

Church Services.

On Sunday next, Oct. 12th, a Harvest Festival will be celebrated in the St. Matthew church (Manitoba Synod) at Spruce Grove. Rev G Potzsch, pastor.

Services in St. Philip's Church next Sunday, 10.00 a.m.

United Church service every Sunday Evg. at 7.30.

Harvest Festival services were held on Sunday last at Glory Hill Baptist church. Rev Benke pastor. There was a good attendance.

What Is Right With Canada?

A moderate optimist, we are told, is one who sees both the good and the bad, the pleasing and the displeasing, the bright and the dark, the encouraging and the discouraging, but prefers to think and talk about the brighter and better things.

At the present time we have more than a sufficiency of pessimists, craters, disseminators of blue ruin gossip. We also have a few incorrigible optimists who shut their eyes and ears to the actual facts of any situation and cry "All is well."

What Canada and the world needs today are more moderate optimists, men and women who, looking at both sides of the picture, refuse to be depressed by the darker colors and shadows and find encouragement and great promise in the brighter colors and the rays of sunshine breaking through the clouds.

Major Yeats-Brown, an Englishman, is the type of moderate optimist whose number should be multiplied. As an offset to the many things that have been said in answer to the query "What is Wrong with England?" he advances the question "What is Right with England?" and proceeds to answer his own question most entertainingly in the London Spectator.

Would it not be advisable for us in this country to also reverse the usual question we hear so often asked these days, and, rather, make answer to the query: "What is Right with Canada?" We may well do so, because there are so many things that are right with this Dominion, so many more right things than there are wrong things, that we are doubly foolish to ignore them and dwell upon the smaller ills.

Looking around Canada we can discover a multitude of good things, the very best things. We find, for example, one of the most healthy, robust people in the world, possessing an abounding vitality and charged with initiative and energy. And of all the blessings which can be bestowed upon a nation or individual, what other one blessing or group of blessings, surpasses that of health? Possessing health all things are possible; lacking it all the wealth of the world is valueless to bring joy and happiness into one's life.

Looking at other countries, we find many of them filled with hatreds, with strife uppermost in the minds of the people, their thoughts and energies devoted to preparation for possible warfare. In Canada, on the other hand, we have a land occupied by a peace-loving people with a positive and growing hatred of war, making no preparations for war, but devoting their thoughts and energies to the arts and advancements of peace. No other country in the world is so "right" on the subject of peace and disarmament as is Canada.

Grouped with health and a sane viewpoint of man's relations to man we can place the moral and intellectual outlook of a nation. Looking over our broad Dominion we find a deep-rooted moral fibre, strong and sturdier than in most lands, with an abiding respect for law and order which no other country can equal, and which far surpasses that entertained by the people of any other country in either North or South America. We find Canada a land of schools and universities, a land in the very front rank of all movements for social betterment; a land the very foundations of which are sound, strong and stable.

Generally speaking, too, Canadian institutions of all kinds, whatever their faults, are strong and sound, constituting a bulwark in defence of the people. A bank failure in Canada is a rare thing; our railways are progressive and efficient, fitting their programmes well into the life and needs of the Dominion. We are not—and never can be—immune from the vicissitudes and effects of world conditions and happenings, but, even so, we have it within ourselves, in our institutions and resources, to withstand the evil effects of world matters beyond our own direct control, and to rally from those bad effects more rapidly than any other land. At this present time, Canada, notwithstanding its difficulties and business depression, is infinitely better off and stronger than most countries, and is suffering from less unemployment proportionate to its population than the United States.

Let us, therefore, dwell a little more on "What is Right?" and the effect of doing so will unquestionably be to lessen interest in the more depressing question "What is Wrong?" Isn't the search for right things most likely to expand and thus diminish keenness in the search for wrong things? And isn't it just possible that the volume of right things will grow and be properly recognized until presently the wrong things are forgotten, or at most given their proper relative place in the general scheme? Let us join the quest of the moderate optimist.

Western Orchards

G. F. Chipman, editor of the Country Guide, predicts that the best future will see orchards of standard eating apples in all parts of the Prairies where wheat is now grown successfully.

Sour Stomach

Just a tasteless dose of Phillips' Milk of Magnesia in water. That is an alkali, effective, yet harmless. It has been the standard antacid for 50 years among physicians everywhere. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant and efficient way to kill the excess acid. The stomach becomes

sweet, the pain departs. You are happy again in five minutes. Don't depend on crude methods. Employ the best way yet evolved in all the years of searching. That is Phillips' Milk of Magnesia. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

English Being Taught In German Schools

Classes Are Popular and Students Show Great Interest

Every boy and girl in Germany is being taught English, according to Prof. Max Zimpe, author of English and German textbooks, who was in New York recently.

"Our students are tremendously interested in anything about America," he explained. "Every language teacher reports that the classes teaching English are very popular. We teach the same pronunciation heard in the South of England."

The school system in Germany is quite different to the United States, the visiting professor says. Over there the aim is to have an aristocracy of learning. They do not desire to have every boy and girl graduate, but rather to make the work so difficult that only the brightest pupils can finish their high school course. Children who are backward in school are given a sound elementary training and then the government apprentices them to a good trade for four years.

CONSTIPATED CHILDREN

Constipation is one of the most common ailments of childhood and the festival is the. These delightful events crowd the late summer and early autumn evenings. In this day and generation of so-called high-speed existence, when we seem to depend so largely on manufactured enjoyment it is indeed a refreshing treat to attend the rural church supper or festival. At these events there is to be found wholesomeness and a plenty of food and association for greater joys than the price paid for the ticket. These affairs are conducted for profit of course, but is a broader profit than monetary gain alone.

A Refreshing Treat Church Supper Gives People Opportunity For Sociability

Sleep is the great nourisher of infants, and without peaceful sleep the child will not thrive. This cannot be got if the infant is troubled with worms. Miller's Worm Powders will destroy worms and drive them from the system, and wherever the child's rest will be undisturbed. The powders cannot injure the most delicate baby, and there is nothing so effective for restoring the health of a worm-torn infant.

Conjuring Creek

Conjuring Creek, the curious name of a northern Saskatchewan river, was first suggested by that of Wizard Lake from which it flows. The Cree name is "Pawgonow."

Good-bye Asthma. Persons suffering from that extremely trying trouble known as asthma know what it is to long with all their hearts for escape as from a tyrant. Never do they know when an attack may come and they know that to struggle unaided is vain. With Dr. J. D. Kellogg's Asthma Remedy at hand, however, they can say good-bye to their enemy and enjoy life again. It helps at once.

An Artist Without Arms

Henry Wiegman, a student artist of Cicero, a suburb of Chicago, was born without arms. But he is one of the promising students of an art school here. Wiegman holds the brush between his teeth and manipulates it with his tongue. He intends to make his living by commercial illustration or in his own gift shop. His ambition to paint dates from the time he learned to write by the same method. He is twenty-three now.

Temperature tests made in the region of a forest showed that the draft and heat from the flames caused a difference of ten degrees in temperature at some distance ahead of the advancing fire.

Minard's Liniment also tried test.

W. N. U. 1858

Don't Gamble With Health

We all know health demands absolute inner cleanliness. But what we often don't realize is the risk we take when we use harsh, gripping purgatives that create a strained, unnatural condition.

ENO is pleasant, gentle, safe and sure.

A daily dash of ENO'S "Fruit Salt" in a glass of water, morning or night, will realize it, sweetens the entire system. Acid stomach, fatigue, biliousness, quickly disappear.

Fire Kept Burning

Century and Half

North Carolina Family Has Not Let It Go Out

Along about the time the Declaration of Independence was being signed a stalwart son of Saxony came to the mountains of Saluda, N.C., to build a cabin for his family. A fire kindled on the newly-finished hearth has never gone out.

William Morris, who doesn't know how old he is, lives alone in the warped log hut, and tends the fire his grandfather started more than 150 years ago. He is the last man of his family.

An efficacious household remedy—Douglas' Egyptian Liniment. Brings immediate relief to lame back and muscular rheumatism. Also relieves inflammation, burns, sores, corns and warts.

Tommy (arriving at the country cottage) — Where's the bathroom, mother?

Mother—There's no bathroom here, Tommy!

Tommy—Good. We're going to have a real holiday, then.

Impatient For Disarmament

League Of Nations Is Called Upon To Take Quick Action

A vehement and sometimes impatient demonstration, urging the hastening of the League of Nations' disarmament programme and early calling of a general conference for reduction and limitation of armaments, was witnessed in the League assembly's disarmament committee at Geneva recently.

From this rally there arose a promise of J. J. Louden, chairman of the preparatory disarmament commission, that the commission would meet November 3 and fervently seek to finish its task of clearing the way completely for a congress of all nations to construct a scheme of general disarmament. Voices from countries that were neutral during the World War, joined those from states which were disarmed by the war in the demand that the League should get along quickly with its long delayed purpose of inducing nations to lay aside their fighting.

Singing is a most valuable exercise for the lungs.

Four Doses Relieved Bad Attack of Cholera

Mr. W. J. Cooper, Mangham, Alta., writes:—"A year ago last spring I arrived in Canada with my family, and one of my boys, aged six, was suffering very much with cholera. When we arrived I had a few hours to wait, and told one of the attendants at the station about it, and he asked me if I had ever tried Dr. Fowler's Extract of Wild Strawberry. I had never heard of it in England, so he told me I could get it in Winnipeg. I am pleased to say I had only to give the child four doses and he got well and was quite cheerful by the next morning."

Foods Stay Fresh Longer This Way

Covered with Para-Sani Heavy Waxed Paper goods that usually made in a day or so stay fresh for quite a long time. Get Para-Sani in the handy, sanitary, knife-edged carton at grocer, druggist or stationer. For less exacting uses get "Centre Pull" Packs in sheet form.

Livestock Is Shown To Be A Prime Factor in Economic Development Of The West

A popular idea is that revenue in the Canadian prairie provinces is derived almost wholly from grains. A second idea is that the growth of home-standing vastly increased grain production at the expense of livestock and cut down drastically the number of head of livestock between the Great Lakes and the Rocky Mountains. Both ideas need considerable revision.

The rapid settlement of the Prairie Provinces made possible by grain growing has been accompanied by an increase in livestock that has more than compensated for the reduction in ranches, so far as numbers are concerned. Self-sustaining farming demands the raising of livestock, and the change in the West in this respect within the past decade or so has been remarkable. Today, though the livestock industry in Manitoba, Saskatchewan, and Alberta has only touched the edge of possibilities, the number of head of cattle, sheep, and swine on farms is an important percentage of the whole in the Dominion. The fact has great value economically, for it tends to spread agricultural wealth more evenly over the seasons than is possible with grain farming only.

The four western provinces have now more than three times as many cattle, more than four times as many sheep and nearly eight times as many swine as there were in the most palmy range day. According to records for the year 1901, when complete records were first gathered, and 1929, are as follows:

Year	Cattle	Sheep	Swine
1901	1,066,827	215,996	241,784
1929	3,564,040	1,114,143	1,728,008

It is interesting to examine the figures representing the livestock production of Western Canada for the last eight years. In arriving at the total it is difficult to gauge the number of head of livestock slaughtered on farms for home use and by local butchers and at small, unsupervised killing plants. The Dominion Bureau of Statistics finds that in the case of cattle inspected, slaughterings run about fifty per cent. of the yearly estimated total kill in Canada, about forty per cent. and sheep about forty per cent. By making the necessary adjustments, therefore, on the inspected slaughterings in the Western provinces a fairly close estimate of the local or unsupervised killings may be made.

Total figures representing some seven and one-third million cattle, over eighteen million hogs and about two and three-quarter million sheep look to the credit of Western Canada at first glance. When it is found by further figuring that in the same period 15,368,697 cattle, 47,481,905 hogs and 10,905,429 sheep and lambs are the estimated total killings in the whole Dominion of Canada, a slightly different aspect of the picture is presented. Continuing with the comparison it is seen that Western Canada produced roughly 48 per cent of the total cattle, 28 per cent of the swine and about 26 per cent of the sheep and lambs.

In this a fair share of the total, or could Western Canada, everything considered, have been expected to produce a greater percentage of the total? If only livestock production is considered in terms of acres of land under cultivation, and suitable for cattle production one might form the

opinion that the West should be marketing two-thirds or three-quarters of the Canadian total, but when the hundreds of millions of bushels of grain that Western Canada ships annually are considered the conclusion is reached that while there is room for great ultimate expansion of the cattle industry there, the West is possibly for the moment carrying a fair share.

Swine production figures, however, are not so easily disposed of in that manner. The fact that so much grain is being produced on the prairies would lead one to believe that the West should be the source of the heaviest hog shipments in the Dominion, for swine production goes hand in hand with grain production. It is produced more cheaply than at the fountain head of the grain supplies. Yet Eastern Canada, with very small grain fields, although having a certain advantage in the matter of dairy by-products, turns out nearly two hogs for every one that comes from the West.

The following table, showing number of bushels of wheat and all other potential feed grains produced for every hog carried in the various provinces respectively, indicates that hog production in the older provinces has become more or less stabilized in relation to their grain supplies, but it also points out the possibilities open to swine men of the West.

Province	1911-15	1916-20	1921-25	1926-28
Maritime	107	118	231	102
Quebec	70	81	85	72
Ontario	109	110	110	100
Columbia	104	90	105	121
Manitoba	680	498	499	394
Saskatchewan	650	571	654	694
Alberta	384	281	230	334

With such low hog production in relation to grain supplies it would appear that not only is there plenty of grain available to increase hog production in the West but great advances in swine marketings might reasonably be expected in the not distant future from Saskatchewan, Manitoba and Alberta. The difficulty attending the marketing of the immense quantities of low grade wheat and feed grains of the 1928 crop, and the apparently more serious ones consequent on the moving of the short high grade wheat crop of 1929, as well as the feed grain crop, should command a far-seeing Western farmer the idea of turning out some of these feeds at the greater relative returns obtainable through cattle and sheep.

Swine agriculture was caused by the fact that last year Canada's net imports of lamb and mutton were over three and three-quarter million pounds. Yet the per capita consumption of lamb and mutton in this country is only about 6.5 lbs. Does not this point out an opportunity for a substantial increase in production of those meats, first, to meet the competition of the imported product and, second, with a view to making lamb a more important item in the average family menu? Western Canada with only 26 per cent of the present production seems to lag in this respect, as sheep are probably the best livestock to assist in the rehabilitation of run down and dirty grain farms.

Canada should be able at least to feed all her people entirely on Canadian grown livestock products, and should be able to produce them at competitive costs with any other country in the world. We have almost everything necessary to insure success in such competition; the one essential thing lacking at present seems to be a definite program and plan of production.

Owned Valuable Coin

After walking around for several months with a \$20 gold piece minted in 1847 in his pocket, Clark La Bounty, of Toledo, decided he'd look up the coin in a catalogue and see how much it was worth. You could have knocked him down with a feather when he read that because of the peculiar thickness of the design it was worth \$2,500.

Sheepmen's Opportunity

Demand For Mutton and Lamb Is Steadily On The Increase

Reports from some leading sheep producing countries is that a reduction in the flocks is taking place. The Bureau of Agricultural Economics in the United States believes the decrease will continue for the next two or three years. This should suggest to Canadian sheepmen a policy of "stay-lag in." Our total sheep number is insignificant compared with the estimated total of about 700 million for the whole world. Still more to the point, it is actually too small for a country of ten million population in which the demand for lamb and mutton is steadily going up. The per capita consumption of these meats is still a long way from being equal to that of some other countries and the indications are for a steadily growing demand for good quality Canadian lambs for a long period.

In the United States the unwieldiness of going out of sheep too strongly is hinted at by the Bureau when it states: "The individual producer is advised to consider carefully his feed supplies and the long-time outlook for the sheep industry, in making his plans for next year. Where feed supplies are available he may find that present conditions offer a good opportunity for improving the quality of his breeding flock."

Raise More Geese

Good Returns Obtained On A Very Small Investment

Geese raising does not receive the attention by the farming community that the business warrants, assert poultry experts of the Dominion Department of Agriculture. The farm is the natural habitat of the geese, providing those two great essentials to successful geese raising — free range and an abundance of green foods. Raising a flock of geese is one means by which the farmer can reap a good reward with a very small investment and comparatively little labour. Geese command a good price on the Christmas market and the demand is always greater than the supply.

World's Grain Show

Many Countries Have Signified Their Intention Of Being Represented

Belgium has officially accepted the invitation to take part in the World's Grain Exhibition, and Conference at Regius, from July 25th to August 6th, 1932. Some little time ago official invitations were sent from the Dominion Government to all countries inviting them to participate and a number of these have already signified their desire to do so. They include Peru, Yugoslavia, Guatemala, New Zealand, Poland, Czechoslovakia, The Netherlands and Belgium.

Find Five Daughters Expensive

Pleading guilty before the city magistrate of Mysore, India, to the theft of jewels from the Prasanna Krishnarani Temple, the high priest testified that his salary was only \$7.85 a month. He added that he had been "cursed" with five daughters, and as their husbands were not able to keep them, he was compelled to maintain their families as well as his own.

The first sandwich from an ox roasted before 5,000 people at a recent charity event at Coalpit Heath, England, was sold for \$2.75.

Veteran Canadian Explorer Returns To Atlantic With Relics Of Franklin Expedition

Satisfied that all the information which it is humanly possible to discover regarding the fate of the Sir John Franklin party, which perished among the Arctic islands off the mainland of Canada 35 years ago, has been gleaned, Major L. T. Burwash, veteran explorer, returned to Ottawa with a number of relics.

His discovery in an abandoned camp on King William Island, between Victory Point and Lady Jane Franklin Point, added little to what was already known, beyond definitely establishing the locale of at least one staying place in the long trek which appears to have ended hundreds of miles south, on the Canadian mainland, near the mouth of Back's Fish River.

The fragment of a canvas tent, circular in shape, and tending close to the assumption that this portion had been frozen to the ground while those occupying it had torn away the "remains" pieces of naval broadcloth, some inch-thick rope, and the rusted blade of a knife constitute Major Burwash's find. He encountered two graves on King William Island, but from these nothing could be gathered. Of the grave of Sir John Franklin himself, no trace was found.

In spite of the 80-odd years that have elapsed since the two ships, "Erebus" and "Terror," set out in an attempt to discover the North West Passage, a certain fascination continues to surround the fate of their crews. For 70 years a veil of silence has shrouded them and only one small scrap of paper has ever been discovered relating to the expedition. This was the report and message found on King William Island by the search expedition of Captain McClintock in 1857. The message, signed by Sir John Franklin, announced how the two ships had wintered at Beechey Island in 1846, and that all was well. But marginal notes on the paper written by another hand at a later date, conveyed the information that Sir John Franklin had died in June 1847. The notes gave the strength of the party as 105 and they proclaimed the intention to essay an overland journey from King William Island to the Canadian mainland at Back's Fish River.

That this trek was attempted is clear from Eskimo tradition. In 1850, Dr. John Rae of the Hudson's Bay Company, surveying the coast-line in that neighborhood, encountered natives who were then using tableware and other utensils which bore the mark of the Franklin expedition. They informed him that years before a group of white men had been seen straggling across the ice to the mainland, "dying as they walked." Verification of the Eskimo tradition was secured at Starvation Cove, where later expeditions located about 40 graves.

The purpose of Major Burwash's flight to King William Island was, in part, to verify, if possible, the story of an American mining engineer, named Jenness, who, many years ago, originated a report concerning the Franklin party which would, if correct, have thrown new light on their fate. This story, in document form, was bought by the Department of the Interior, from T. W. Jackson, of Vancouver, B.C. In his report to the minister, Major Burwash definitely establishes that the Jenness story is without foundation.

With two companions, Pilot Gilbert, of the Western Canada Airways, and Riedt, of the Department of the Interior, Major Burwash flew from Bernard Harbor, northwest of the mouth of the Coppermine River, to Boothia Peninsula — the magnetic pole — and thence to King William Island. Landing in a fresh water lake some distance inland, he prosecuted his search between Victory Point and Lady Jane Franklin Point. Having made his discovery, he returned by the Coppermine, thence south to Great Slave Lake, Fort Smith, and McMuray, Alberta.

Over 2,000 photographs were taken by Mr. Frannie during the flight. These will be of great value to topographers in correcting many inaccuracies regarding the coastline of the mainland and the islands over which the party flew. Matty Island, for example, near where it is believed the remains of the Franklin ships sank, is not an island, but an archipelago comprising hundreds of islands. Other discrepancies were noted.

International Boundary

Important Work In Connection With Demarcation Of 5,000 Miles Of Border

In carrying out his duties of maintaining in a state of effective demarcation the 5,000 miles of international boundary between Canada and the United States, in accordance with the provisions of the Treaty of 1925, the International Boundary Commission, the Canadian section of which functions under the Survey Bureau of the Department of the Interior, has this year a number of important operations on hand. These include reopening the vista and repairing the monuments on some fifty miles of the highlands boundary between Quebec and Maine, making surveys for the revision of certain of the boundary maps between British Columbia and the state of Washington, and erecting monuments at the point where an important international highway between Kelowna, B.C., and Portland, Oregon, crosses the boundary. It is also intended to locate and mark the boundary in the new Detroit-Windsor tunnel before it is officially open for traffic.

Cautiously Sidelined: "Help! Police! I am losing myself!"—Ruen Hupner Madrid.

NORTH AMERICA'S CHANGING GOLD PRODUCTION

North America is, next to Africa, the chief gold-producing continent, usually contributing about one-quarter of the world's annual gold output. Within the past decade the North American production of the yellow metal has rather more than held its own, but this showing has been due entirely to the fact that Canada's rising output has been sufficient to offset the declines in the United States and Mexico. Ten years ago the gold output of the United States was three times as great as that of the Dominion. Today the two countries are almost on a par in that regard.

"Look please, please."—Lustige Sachse, Leipzig.

GESTION

Banished by Kruschen

"I suffered for some years from a bad stomach. I used to feel very miserable after meals. The doctor advised me to take Epsom Salts. It did me no good. I decided to try Kruschen and am now taking it, and have done for the past 12 months, and I am very glad to tell you that my stomach is now in perfect order. I feel as young in spirit as I was 20 years ago, thanks to Kruschen." (W.B.)

You know how badly an engine runs when it gets clogged up. It's the same with your body when your gastric or digestive juices fail to flow. What you need is a tonic—Nature's own tonic—Nature's six mineral salts.

You get all these six salts in Kruschen. The first effect of these salts is to promote the flow of the saliva and so awaken the appetite. The next action occurs in the stomach, where the digestive juices are encouraged to pour out and act upon the food. Again, in the intestinal tract, certain of these salts promote a further flow of these vital juices which deal with partly digested food and prepare it finally for absorption into the system.

WORLD HAPPENINGS BRIEFLY TOLD

Bound for Germany to negotiate a settlement for accounts outstanding between that country and Canada, Hon. C. H. Cahan, Secretary of State, sailed recently from New York.

The London Daily Herald reported that King George recently wished to confer a title upon George Bernard Shaw in recognition of his literary eminence, but that Shaw had declined.

Prince Leopold, of Bavaria, field marshal of Germany and commander of the German army in the east during the earlier stages of the war, is dead. He was 84 years old. Death was caused by pneumonia.

The first woman accountant in the province of Quebec was received into the membership of the Society of Chartered Accountants, when Miss Charlotte N. Howell was presented with her entrance certificate.

Crime in Great Britain has deteriorated so much that prisons are operated far below capacity and several have actually closed for lack of occupants, states Dr. Higgins, medical officer of the prison in Liverpool.

Order-in-council granting a loan of \$50,000 to the Manitoba Cattle Loan Association was passed by Manitoba's cabinet council. The association secured the money at five per cent, and will charge members seven per cent. for advances secured by lien notes on cattle purchased.

The parliament of New Zealand has approved a scheme to establish a national art museum to include a war memorial and a carillon. The citizens of Wellington have subscribed \$500,000, and the government has granted a subsidy of the same amount.

"If you haven't a doctor," said the tourist at the hamlet inn, "what happens when anyone is taken seriously ill?"

"Oh, they just die a natural death."

In all Belgium there are only about 12,000 unemployed.

SUNDAY SCHOOL LESSON

OCTOBER 12

MARY, THE MOTHER OF JESUS—AN EXAMPLE OF MOTHERHOOD

Golden Text: "Mary kept all these sayings, pondering them in her heart."—Luke 2:19.

Lesson: Luke 2:15-19; John 2:1-5; 19:26-27.

Devotional Reading: Psalm 67.

Explanations and Comments

The Mother of the Babe, Luke 2:15-19.—The shepherds were amazed at the message which had come to them, but they were not incredulous, and they said, "Let us now go even unto Bethlehem, and see the thing that is come to pass which the Lord hath made known unto us." Read the whole beautiful story in Luke 2. They went and found the Christ-child in the manger, and his mother Mary, and also Joseph. To Mary they told what the shepherds told what they had heard and all marvelled, but Mary retained their words in her heart, pondering them over and over.

The Mother of the Man, John 2:1-5. The third day after Jesus' talk with Nathaniel, John 1:47-51, He came to Cana of Galilee, Nathaniel's home town. At a house where Mary was well known, wedding festivities were being held, and when her Son appeared with His followers they were invited to attend. Toward the end of the festivities, which lasted several days, the supply of wine began to give out. Mary saw this, and turned to Jesus for help. "They have no more wine," she told Him. She made no request; she simply told Him of the situation.

The Mother of the Saviour, John 19:25-27.—Standing by the Cross of Christ were His mother, her sister Salome, Mary the wife of Clopas, and Mary Magdalene. (The two phrases, "His mother's sister, Mary the wife of Clopas," may be taken to refer to one woman, but in that case the two sisters were both called Mary, which is improbable.)

"O the weight of her affliction! Hers, who won God's benediction. Hers, who bore God's Holy One. O that speechless, ceaseless yearning. O those dim eyes never turning From her wondrous, suffering Son!"

Jesus looked upon His mother and John ("thou disciple whom He loveth"—John never mentions his own name in His Gospel), and said to His mother, "Woman, behold thy son!" and to John, "Behold, thy mother." Dr. P. B. Meyer suggests that Jesus said to his mother, "Behold thy son!" and to John, "Behold, thy mother." Dr. P. B. Meyer suggests that Jesus said to his mother, "Behold thy son!" and to John, "Behold, thy mother."

In that hour of excruciating agony he did not forget his mother's need. No other person's sorrow was eclipsed by His own. He was never self-centered in His grief, so as to ignore the weakness of others.—J. H. Howell.

And from that hour John took the mother of Jesus into his own home.

Persian Balm—the perfect aid to beauty. Essential to real feminine distinction. Results always in the highest expression of beauty. Its use keeps the hands always soft and flawlessly white. Indispensable to the whole family. Imparts added charm to the mother. Serves the father as a hair fixative and cooling shaving lotion, and protects the tender skin of the child. Persian Balm is the true toilet requisite.

Shipbuilding in Sweden

Sweden Maintains Lead In Industry Among Scandinavian Countries

Sweden maintains its lead in the shipbuilding industry among the Scandinavian countries, according to the latest reports. At the Swedish yards 26 vessels with an aggregate tonnage of 127,000 gross tons were in the course of construction at the end of the first half-year. Denmark comes second with 29 ships of 116,000 gross tons and Norway third with 33 ships of 40,000 gross tons. Of the ships at present being built in Sweden nine are steamers or motorships, 2,000 gross tons each, two motorships of 2,000 to 4,000 tons, four motorships of 5,000 to 6,000 tons, and six motorships of 8,000 to 10,000 tons.

An Oil Without Alcohol.—Some oils and many medicines have alcohol as a prominent ingredient. A judicious blending of six essential oils composes Dr. Thomas' Electric Oil, and there is no alcohol in it, so that its effects are lasting.

Conduct Mass On Eiffel Tower
A religious mass was said at the top of the great Eiffel Tower recently, the first time since it was built more than 40 years ago. It took place in the lofty wind-swept "little cage" 4,000 feet above the earth. A small table was used as an altar and the music which accompanied the liturgy was the breeze. Special tribute was paid to M. Eiffel.

Athletes recommended Minard's Liniment.

Tea Biscuits unusually good when made with Magic Baking Powder

If you bake at home send for the New Magic Cook Book. It will suggest many attractive dishes and save time for you.

Look for this mark on every tin. It is a guarantee that Magic Baking Powder does not contain alum or any harmful ingredients.

3 out of every 4 Canadian housewives* who bake at home, use Magic Baking Powder because they find that Magic gives consistently better baking results.

Next time you bake biscuits, try Magic and see for yourself how it will help you with your baking.

Try This Recipe for Biscuits

2 cups flour
4 teaspoons Magic Baking Powder
1 cup cold sweet milk, more or less
1 teaspoon salt

Method—sift together flour, magic baking powder and salt, then cut in shortening. Gradually add cold milk sufficient to make as soft a dough as can be handled, using a knife to mix with.

Flour centre of board generously, drop dough on it, pat or roll out very lightly to 1" thickness. Cut out, bake 15 to 20 minutes in a hot oven. All ingredients should be cold. Handle as little and as lightly as possible and avoid working in more flour after milk has been added.

*This fact was revealed in a recent Dominion-wide investigation.

Try To Decipher Document

Second Andree Diary Causing Experts Much Difficulty

Experts examining the documents found with the remains of members of the Andree balloon expedition in icy Hvitoen are having difficulty with the second of the Andree diaries, which they believe contains the record of the last days of the trio.

It had been exposed during the 33 years since the death of the three men and its contents are well high erased by time and the elements.

Jimmy (watching something tasty going into sickroom)—Please, ma, can I have the measles when Will's done with them?

Saving For the People

Says Saskatchewan May Save Over \$300,000 In Connection With Freight Rates On Canned Goods

"People of Saskatchewan will save over \$300,000 this year on canned goods," states Hon. J. A. Merkle, Minister of Railways and Labor. The figure \$300,000 had been given to the department as the estimate of a large wholesale grocery firm with a warehouse in Regina, he said.

"The estimate will be very close to correct," Mr. Merkle said. The rates in effect would continue until the close of navigation on the great lakes and then the matter "will have to be fought out all over again," he added.

The government had received the support of the boards of trade of Saskatchewan, the Retail Merchants' Association, and the United Farmers of Canada in the fight, which had been won on July 14 and September 16, Mr. Merkle said in conclusion.

Made It Balance

The wife had been put on the budget plan. At the end of each month she and her husband would go over the accounts together. Every once in a while he would find an item, "L.O.K., \$6."

Finally he said, "My dear, what is this—'L.O.K.'?"

"Lord Only Knows," she replied.

An Emergency Dressing

Minard's is invaluable as a quick dressing for burns, scalds, and all flesh abrasions. It cleanses and soothes the wound.

GOV'T PROGRAM ENLARGED FOR RELIEF PURPOSES

Ottawa, Ont.—Details of the Federal Government's campaign to relieve unemployment in Canada were outlined recently by Senator Gideon Robertson, Minister of Labor. Between \$80,000,000 and \$90,000,000 will be "put to work" to better distress conditions and provide work for Canadians, he said. This included the \$20,000,000 supplied by parliament at the last session, the remainder being contributions from the provinces and the municipalities, and the \$21,000,000 program of construction and improvement work to be undertaken by the Canadian National and the Canadian Pacific railways.

The Federal Government's scheme was not limited to setting aside money for construction in co-operation with the provinces and municipalities, the Minister of Labor declared. A sum of \$4,000,000 would be set aside for "direct relief." The grade separation fund of the board railway commissioners would be augmented by a total of \$1,000,000 for the benefit of any subway work undertaken. The government would contribute on a 50-50 basis with the provinces in building a trans-Canada highway from Sydney to Vancouver, and was prepared to pay 40 per cent. of the cost of general provincial highway work this winter.

There will be other angles to the government's relief program, Senator Robertson emphasized. Tariff changes made at the last session would afford immense stimulus to Canadian industry, he believed, and would result in the creation of more jobs. Restrictions had been placed on immigration for the benefit of Canadian labor. It was the minister's belief that the expenditure of from \$50,000,000 to \$60,000,000 throughout Canada in relief work by one kind or another, would reach every type of laborer, clerk or artisan.

The program of construction and improvements to be undertaken by the two large railroad companies, which has been formally approved by the cabinet, would result in the employment of 10,500 men for a year, Senator Robertson said. In addition, 2,000 teams of horses would be needed for grading purposes and this would be of benefit to great numbers of farmers. The whole program, he stated, called for the expenditure of \$2,000,000 with work to start immediately. Orders would be placed at once for rails, Nova Scotia coal and other necessary supplies. Because these orders were not usually given at this time of the year, it would be necessary to make arrangements to raise the money, Senator Robertson explained. Because of this, the government had decided to set aside \$1,500,000 out of the \$20,000,000 fund to guarantee interest and carrying charges to the railroad.

The first agreement with any of the provinces—Manitoba—has been concluded and awaits ratification by the cabinet. Representatives from Ontario have been in conference with the Minister of Labor and a start was made on negotiations with Alberta. New Brunswick representatives are in Ottawa and Prince Edward Island and some of the other provinces are scheduled to commence negotiations early this week.

Making Inspection Trip

Hon. R. J. Manion To Look Over Bay Railway and Terminals

Ottawa, Ont.—On his first inspection trip, Hon. R. J. Manion, Minister of Railways and Canals, departed from the capital to make a personal survey of the Hudson Bay Railway and the terminals at Churchill. Dr. Manion will be absent from Ottawa for a fortnight.

Accompanying Dr. Manion were his deputy, D. I. Smart, Col. A. E. Dubuc, chief engineer of the department and Charles Hadow, assistant high commissioner for Great Britain.

R-101 Makes Trial Trip

Cardington, Eng.—The re-conditioned dirigible R-101, which is the largest airship in the world since it recently was lengthened, has made a short trial trip preparatory to a voyage to India.

Stresses Empire's Greatness

Hon. R. B. Bennett Addresses Brilliant Gathering in London

London, England.—With a brilliant gathering in attendance the delegates to the Imperial Conference were entertained at the Guildhall by the Royal Empire Society and other Imperial bodies.

"In the diversity of the peoples of our Empire, their talents and their resources, lies the real secret of the Empire's greatness," declared Hon. R. B. Bennett, prime minister of Canada, in his address.

The speech of the Canadian prime minister was greeted several times by cheers.

"Before us," said Mr. Bennett, "lies the task of Empire consolidation and with that task we meet in the heart of this great city, where trade, commerce, finance, and other great affairs engage the attention, to think of our Empire as an economic unit."

Mr. Bennett was cheered when he declared the nations of the Empire were not yet bankrupt in statesmanship. Men and women occupying a quarter of the land surface of the globe and comprising a quarter of its population, were still capable, by guidance and leadership, of achieving in the future what they had not already achieved, namely, the economic solidarity of the Empire which was as capable of achievement as the development of their constituent liberties had been.

H.R.H. Prince Arthur of Connaught, former governor-general of South Africa, presided at the banquet.

Won Citizenship After Long Court Battle

But Woman Refused To Take Usual Oath For Naturalization

Lima, O.—Mrs. Carl Landis, Philadelphia, who refused to take oath to kill in defense of the United States is now a citizen after a court battle lasting a year and a half.

She took the oath of allegiance, still reserving her opposition to bearing arms; she would serve as a nurse and shed her blood if necessary in time of war.

Common Pleas Judge A. M. Rogers admitted the reservation and granted citizenship over the protest of the assistant supervisor of naturalization.

Mrs. Landis came from Alsace-Lorraine in 1910, and was married since she began her fight for citizenship.

Have Extensive Program

Railways To Proceed With Construction and Improvement Work

Ottawa, Ont.—Official announcement has been made by Senator Robertson, Minister of Labor, that the Canadian National and Canadian Pacific railways would proceed immediately with a \$220,000,000 construction and improvement work. Employment for 10,500 men would thereby be provided for a year, and 2,000 teams of horses would be given work for a considerable part of the time, especially for grading purposes. The employment of teams will help the farmers in many districts.

Vancouver Wheat Exports

Shipments To Date Double the Amount Of Record Year

Vancouver, B.C.—Wheat exported from Vancouver during the current crop year to date totalled 8,283,378 bushels, double the amount shipped out during the same period of the record crop year of 1928-29 through Vancouver, when total shipments reached 100,000,000 bushels. Last year at this time only 2,679,378 bushels had been shipped.

To Teach Natives

Leningrad, Russia.—Geologists, pedagogues and other scientists have gone to northernmost Siberia where 5,000 nomads live in one of the remotest corners of the world. They expect to teach the natives how to fish better, to start rearing farms, a cannery, tannery, meat cannery and a plant to make iodine from seaweed.

Headed Nova Scotia Liberals

Halifax, N.S.—Angus L. Macdonald, headmaster of Halifax, was chosen leader of the Liberal party in Nova Scotia in open convention here.

MINISTER OF AGRICULTURE

Hon. Robert Weir, Minister of Agriculture in the Federal Cabinet.

Staff Reduced When Resources Handed Over

Accounts Can Be Handled By Smaller Number Of Clerks

Edmonton, Alberta.—No ceremony of any kind marked the formal transfer of Alberta's natural resources. Twenty-eight officials, clerks and stenographers in the Dominion Lands office here, found themselves out of employment, as transfer of the resources was made.

Regina, Sask.—Effective reduction of staff to permit financial savings by the administration of the natural resources is forecast by Premier J. T. M. Anderson in a statement issued as the provincial government took over the natural resources of Saskatchewan.

The transfer of the natural resources involves the transfer of about 20,000 accounts for grazing leases, mining claims, timber permits and contracts, land sales and contracts and school land contracts.

Hope Is Fulfilled

First C.P.R. Train Reaches Historic Town Of Battleford

Battleford, Sask.—Another page in the history of Battleford was written when the first Canadian Pacific railway train pulled into the depot at 12:30 on the afternoon of Sept. 30.

To the citizens who crowded the station platform, it was a fulfillment of a long cherished hope, which had its birth in 1875, when the first project was made which was to carry the steel from Winnipeg, Port Livingston, Battleford, through the Yellow Head Pass to New Westminster.

In 1881 it was decided that the route should be diverted to serve the southern part of the province, and for nearly half a century citizens of this historic town have labored for the achievement marked recently.

ROBERT BUCK, TO ATTEMPT TO LOWER RECORD

Robert Buck, 16-year-old Elizabeth, N.J., and who made his first flight eight months ago, will take off soon in his Pittsford biplane in an attempt to lower the junior coast-to-coast flight record. He is a friend of Eddie Schneider, 18, present holder of the transcontinental mark.

Maritime Ports Are Important To Canada

Only Avenues Open On Our Atlantic Coast At Certain Seasons

Halifax, N.S.—Emphasizing the important position the ports of the Maritime provinces hold in relation to the Dominion at large, Sir Henry Thornton, president of the Canadian National Railways, reminded his hearers at a luncheon given in his honor here, that, at certain seasons of the year the harbors of the Maritime provinces are the only avenues of ingress and egress on the Canadian Atlantic coast.

To contemplate any separation of the Maritimes from the rest of Canada, said Sir Henry, "would be to contemplate economic suicide." The position of the Maritimes economically, he added, was the best in the Dominion today. He pledged the fullest co-operation and support of the C.N.R. in development of the port and province.

Canada's Fire Loss Heavy

Total Of \$47,000,000 Shown In Report For Last Year

Ottawa, Ont.—The fact that Canada's fire loss last year—\$47,000,000—represented almost two and one-half times the amount the Dominion Government set aside to relieve unemployment, was called up by Premier John Bracken of Manitoba, to impress on delegates to the Dominion Fire Prevention Association convention the need for greater effort.

Prime Minister R. B. Bennett was named honorary member. W. H. Shapley, Toronto, is the new president.

Among the many resolutions given approval was one recommending that institutions receiving financial assistance from federal, provincial or municipal authorities be compelled to provide adequate fire safeguards.

Develop Wheat Markets

Federal Government Approaches Sum Of Money For Practical Demonstrations

Ottawa, Ont.—In an effort to develop the markets for Canadian wheat, the Dominion Government has appropriated a sum of money to be used in practical demonstrations of the use of Canadian flours for baking purposes.

These demonstrations will take place first at different points in the United Kingdom, subsequently expanded to European countries.

Japan Taking Census

Tokyo, Japan.—Japan is taking a census of its population in the empire's second decennial census. Preliminary estimates stated the census would show the population of the whole empire at about 89,000,000.

ARE PLEDGED TO THE CAUSE OF EMPIRE TRADE

London, England.—The self-governing nations of the British Commonwealth pledged themselves to the cause of Empire trade. Throughout the speeches which marked the opening proceedings of the Imperial Conference the ever-recurring note was the desire to co-operate, to meet the common problem with common action.

"I should like to make this conference another turning point in the wonderful history of our people," exclaimed Prime Minister Ramsay MacDonald in a radio broadcast. "Our weakness," he continued, "is in our psychology far more than in our skill, our material or our resources. It is a renewal of will that we need."

"What we have to consider," said the British Prime Minister, "is opening the conference, 'Is, I would suggest, what practical means we can devise for helping one another, and thereby helping us all, always remembering the fact that we are in contact and internal industrial circumstances to which we have to accommodate ourselves.'"

The conference, for the first time, met in the great Locarno room of the Foreign Office. "At this table," said Mr. Ramsay MacDonald, "are the shades of many great men and of many great events which are enshrined in a history common to us all. They do not receive from all of us the same welcome or the same homage. But there are, dignified by time, their aspects and their results smoothed and mellowed by the passing of the years and by the progress of the pageantry of history which is now our inheritance for good or for ill."

"We are still in the flesh, with fate or destiny still unwritten regarding us who have to live and plan for the future. We face a world still unsettled; beyond us is a prospect of intangible fears, set purposes, unhappy suspicions, firm convictions, numbing experiences and yet defiant idealism. It is our duty to try and find a sure way amidst the confusions—a way which those who will sit here after us will gladly pursue to the goals which are to us but promises. If it be our good fortune to find that way, it is only because we have confidence in each other, because we are inspired in all our deliberations by the spirit of free association, and guided by a will to co-operate not only in doing our own duties but in giving an example of autonomy within unity to the rest of the world."

And the sentiments voiced by Mr. Ramsay MacDonald were echoed in the address of the speaker of the Dominion prime ministers.

"My colleagues and I represent the people of Canada," Mr. Bennett declared. "We come to this conference not only with a message of affection and goodwill, but in the strong belief that, by the concerted action of the whole, we can advance the interests of all sections of the Empire."

Pilot's Death "Misadventure"

Fort William, Ont.—"Misadventure while teaching advanced flying" was given as reason by a coroner's jury, for the death of Capt. James A. Dickie, Bishop's Field Flying Club instructor, who was killed when his plane crashed near here, September 9. Miss Maria Swain, passenger in Dickie's Moth plane when it met disaster, was unable to testify. Suffering from lapse of memory, she said she was unable to remember anything of the fatal flight.

Eleven Burned In Explosion

Veleya, Guanajuato, Mexico.—Eleven persons were badly burned as 5,000 skyrocket exploded in San Miguel cathedral during the celebration of the San Miguel Saint's Day. The fireworks, which had been stored in the church for the celebration, were ignited by a skyrocket which exploded.

Found Water Too Cold

Dover, England.—Miss Mercedes Glets, British woman swimmer, failed in a new attempt to swim the English channel. Hearing the water she stayed in only about four hours, abandoned her efforts because of the intense cold.

A Pupil Injured.

While playing with some schoolmates at the Muir Lake schoolhouse, during recess on Thursday last, Oct. 1st, young Cornelius Gamble had the misfortune to have his leg broken. He was conveyed to his home by the teacher, Mr Gordon Willis. The lad's injuries were attended to by Dr Walton.

Stony Plain and District

This is DANCE WEEK, when the big event of the season takes place tomorrow night in Moose Hall, with Martin's Orchestra playing.

Mr George J Bryan was present, Friday, at the meeting of representative Liberals held in the Macdonald hotel.

Mr J McGillies has returned to his duties as night agent after spending a vacation in the Rockies.

Messrs Art Mundt and G Davis left Monday for Stony Creek, Pouce Coupe district.

F M Hawes, of the Canadian Bank of Commerce staff at Vegreville, has been transferred to the staff at the local bank.

Miss A Foerster was home over the week end, from Camrose.

The light and power supply was off, in a part of the town, for about 90 minutes, Sunday afternoon.

Holborn U.F.W.A. intend holding a Hard Times dance Oct. 24.

Spruce Grove News

Corp. Moses popped into the Grove on Monday for a short visit with old friends. The Corp. is now stationed up at Athabasca, and likes his work up in the new district.

Insp. Fyfe gave the classes in the local school the once-over on Friday last.

Advertising pays — Jack Nichols had an advt. in The Sun for a barber wanted, and now he announces he has secured the services of a first-class barber, to start on Saturday next.

While your correspondent and other villagers were reposing peacefully on their downy beds the other morning, Mr Joe Miller arose, ducked out, and returned later with a nice bag of mallards.

Railway Time Table

Going East—Every morning at 6.23. Every Monday, Wed. and Friday at 7.01.

Going West—Sat., Tues. and Friday at 13.28; every midnight at 24.13.

United Church Notes.

On Sunday last the pastor took for his subject "The Audacity of Faith," based on the text in Jer. 32. 15.

At Stony Plain and Spruce Grove preparations are being made for special Harvest-Thanksgiving service.

Rev A Steward, retired minister, of Edmonton, took part in the service at Stony Plain.

Walther League News.

On Oct. 12 the regular social gathering will be held at St. Matthew No. 1. The first half hour will again be devoted to the study of the Catechism. This will be followed by well planned and supervised entertainment.

Sunday Oct. 19 will be a banner day in the annals of the local society. The reason? The West Edmonton Zone Rally will take place in our midst. The committee in charge have already planned a program complete with instructive as well as entertaining events from morning till night. The complete program will appear in next week's issue of this paper.

Another step towards our great goal of assisting our church! A choir, sponsored by the W. L., has been organized in our midst! Election of officers will take place next Tuesday Oct. 14. Mr G Barth will be director. More definite word will follow in short time.

The W. I. Conference.

The Stony Plain Constituency W. I. held their annual conference Oct. 1 in Winterburn hall, Mrs R E Wood presiding; 38 delegates from the 4 W I branches attended.

Mrs Montgomery gave an address on "Beginning of Agriculture in Alberta and the Growth of W. I. Movement."

Mrs Short described the W. I. exhibit sent to the Canadian National Exhibition at Toronto.

Representatives present—Tomahawk, Mrs W F Combs; Duffield, Mrs J Clements; Winterburn, Mrs A Gobeille; Stony Plain, Mrs F W Yeats.

Musical numbers were given by Mrs J Sutter, Mrs F W Yeats, Mrs H J Montgomery, Mrs M McLeod accompanied. Readings by Mrs Heap and Miss Jackson.

A luncheon prepared by Winterburn members was enjoyed by the delegates. On invitation from members of Tomahawk branch, the 1931 conference will be held there.

NOTICE !

A Reward of \$25 will be paid for information leading to the conviction of the person or persons responsible for breaking street lamps on the Company's street lighting system. A similar reward will be paid for information leading to the conviction of any person or persons interfering with the transmission lines of the Company in such a manner as to cause a hazard to the service on the said lines.

Young Schram Killed.

While working on his father's threshing outfit, on Friday last, Herman, the third son of Mr and Mrs Ph Schram, had the glove on his right hand caught in the tractor belt, pulling in his hand and arm. Before the machine could be stopped the flesh on the arm had been torn off and the bone broken above the elbow.

The sufferer was hastily conveyed to an Edmonton hospital, where the wound was dressed. In addition to this injury, the young lad had the right side of his head partly crushed in; the latter injury being looked on by the hospital experts as the more serious of the two.

The young man passed away in the hospital on Saturday night, without regaining consciousness.

Deceased was 18 years of age, and leaves to mourn his loss his parents, 4 brothers, Philip, Emil, Adam, Edward; 3 sisters, Emma, Clara and Evelyn.

The funeral took place on Wednesday, a service being held in the Peace Lutheran church at the Grove; interment took place in the family plot in the churchyard.

The parents of the young man have the sympathy of the community in this, the second accident to a member of their family in a short time.

Mr and Mrs Morrow Honored

Some of the friends of Mr and Mrs Morrow gathered at Spruce Grove United church Oct. 2nd for the purpose of showing their appreciation of these popular business people who are about to leave for their former home at Drayton Valley. The event took the form of a dinner which was most sumptuously supplied by the Ladies Aid. At the close a presentation was made of a beautiful silver dish. This was done by Rev G A Lander, who spoke very highly of the guests, having known them 14 years. Fine speeches were made by Messrs McLaughlin, Macdonald, Pearcey, Finchbeck. Mr and Mrs Morrow made appropriate response.

Selection of Dairy Cattle Breeds Influenced by Shows

A good typical Ayrshire sire

Putting on the finishing touches.

Many a man who is undecided as to the breed of dairy cattle that he will select has been influenced in making his decision by the animals of a particular breed that he has seen in public.

The individual breeder secures a great deal of advertising as the result of exhibiting at fairs, or in offering good animals at public sales. It gives people a chance to see and know the kind of stock that a man is breeding and paves the way for future business.

It is essential that special care and attention be given dairy animals far in advance of the time that they are to be exhibited or sold. Exhibiting or selling animals publicly in their every day clothes is poor advertising and puts them at a disadvantage when the competition is keen.

It takes several weeks to put a dairy animal in good show condition and what applies to fitting for show applies as well to fitting for sale.

It is important that the dairy animal to be exhibited or sold be in good flesh. A good covering of flesh adds to size, increases smoothness and indicates that the animal is thrifty and in good health. Dairy animals being fit to need extra feed.

Stabling and blanketing are great aids in putting the hair and hide in condition. By stabling in summer, the animal is protected from the hot sun which makes the hide harsh and stiff to the touch. A roomy box stall that is kept clean and well bedded

provides desirable quarters. Continuous blanketing helps keep the animal clean, sweats the hide, thus improving its handling qualities and makes the hair lay to the body. The blanket need not be expensive but it must be tied on securely.

Every dairy animal that is to be exhibited should have the hair clipped from the entire body about three weeks previous to the date of the show or sale. This will get rid of the old hair and allow a new even growth to develop which will greatly improve the appearance and increase the selling value of the animal.

A point often overlooked in the preparation of a dairy animal for show or sale is that of training to lead and stand properly. An untrained animal cannot display its good points to advantage if it cannot exhibit its property. A little time spent each day in training to handle properly will save effort and embarrassment at the show or sale and increase the financial return.

While in the show or sale ring, the man in charge of an animal should have one main thought in mind, namely that of showing the animal to advantage. By this is meant that when it stands, its feet are properly placed, back straight and head alert. Any movement on the part of the attendant or animal should be as graceful as possible. Trail the ribbons are placed or the auctioneer's hammer falls, take no chances.

CHAPTER I—Continued

Bore her—Nick, who had never said a dull thing in his life! And he really meant it. She could tell by the look in his eyes. He wasn't joking. It made her smile, even as she answered shakily, because she couldn't quite control her voice: "I always knew, Nick, that you possessed a streak of chivalry; but to have it carry you to this extent—"

"Chivalry be damned!" he interrupted. "That's common, my dear, and you know it. Come on, Gay. Be a sport. Put on your old grey bonnet or whatever headgear you prefer—take a few necessities in a handkerchief, and—"

He closed his eyes, folded his arms, and softly sang: "Oh, that we two were Maying. . . ."

Nick's voice, sweet and true as a bird's, always stirred the girl. She turned now and laid her hand on his arm. "You're a good friend, Nick—no the best I ever had, or ever shall have. I never forget what you've done for me just now. Somehow, it makes everything easier, but I refuse to spoil your freedom, dear old boy."

Nick squeezed her hand. "A half hour ago," he proclaimed loftily, "I stood in the orchard beneath my my late uncle, and announced to all who cared to hear that I could conquer the world. And now you imply that I can't conquer a slip of a girl in a pink gown. I refuse to be vanquished! Something tells me that you'd be able to put up with me. Without conceit, I think I can promise to prove a more thrilling housemate than Miss Sadie. Run along now, and pack your bag. I'll allow you a suitcase as far as State Line. In forty minutes—thirty, I'll be at the back gate in uncle's rusty silver. We'll leave it behind us when the parson has done his worst. Be gone, girl. The hour waxes late."

"Are you really—proposing to me?"

Gay's cheeks burned, and the young man answered: "I am. Gee! I've always supposed it would be a fearful undertaking, and it comes as easy! For two cents I'd kiss you, if I wasn't afraid Selma was at the window."

To his surprise Gay stifled a sob. "I—can't, Nick."

"Why not?"

"It wouldn't be fair."

"Not to you, perhaps," he agreed amiably. "For me, it would be a cinch."

"You're so young," she hesitated. "I'm older than you!"

"Not really," she contradicted. "Not in your feelings, Nick. You're just a kid."

"Before night," he announced proudly, "I'll be a married man; but not if you dilly-dally this way. My dear, it's the very top of the morning. Let's be off."

He arose, pulling her to her feet, and at his touch something of his own buoyancy and enthusiasm swept through her. Her eyes sparkled. She said, her heart palpitating wildly: "Oh, I'd love it, Nick, but—"

"But me no buts," he quoted, and turned away, calling over his shoulder: "In thirty minutes at the back gate. . . . And stooping to rescue the emblems of freedom that he had dropped for her sake, vaulted the low wall and disappeared."

CHAPTER II

Thirty minutes! Gay stood paralyzed in her own little room, to which she had fled when Nick arose away. "In thirty minutes," he had said, "at the back gate." How could one get ready to change one's entire life in a half hour? The idea was preposterous. There was so much to do: a note of explanation to Miss Sadie; a lunch to save the price of dinner at the hotel, thought prudent Gay; a suitcase. . . . What, oh what should she put into her suitcase?

Still dazed, she opened her closet door, where, as if in answer to question, hung a big bandanna that had adorned her shoulders when she acted as Gypsy fortune teller at a church fair. The sight brought an inspiration. Either the suitcase! She would be as good a tramp as Nick himself! Gay laughed joyously. She didn't know that this inspired decision was something Nick was never to forget; but she felt dazed no longer as she snatched the handkerchief and spread it on her bed. In five minutes she was out of the pink gown and slipping into a khaki middie. In fifteen she was tying a knot in a bulging bandanna bundle. In twenty she was scribbling a hasty note which was doomed to scandalize Miss Sadie Twichell; and in thirty, when Nick, true to schedule, arrived at the back gate, she stood waiting, breathless, to be sure, but waiting, her bundle tied to the late Grandpa Twichell's cane swung over on his shoulder, a crimson sweater on her arm, a crimson tam on her head, and a lunch basket at her feet.

"On time," said Nick. His eyes, sweeping upward from the stout Oxford on her small feet to the stick and bundle, widened with surprise. Gay never forgot that look. If, in those thirty minutes Nick had regretted his rash decision, his fears were put to flight. The smile he threw her caused Gay's heart to sing. Nick was pleased!

"Good girl," he said with vast approval, and was at her side. He lifted the basket questioningly.

"Lunch," Gay answered. "I'll save buying one."

Nick laughed. "I see, I have chosen on a thrifty wife," he said and proceeded without further comment to stow away her bundle in the back of the machine.

There followed a quarter of an hour that to Gay seemed breathlessly constrained. It wasn't the silence—she was used to silences with Nick; it was something within herself—something that asked: "Oh, have I done right? Is this fair to him?"

As for Nick, he appeared to be unnecessarily intent upon the familiar road. It was not until the town was left behind, and they had chugged to the top of Sunset Hill, that he stopped the car, breaking the silence to say quietly: "Take your last look at our native haud, Gay."

She arose and turned about, laying a steady hand upon his shoulder. Something clutched at her heart as she looked down on the town that

True dyes are easiest to use!

Dresses, drapes or lingerie look new when they're dyed with Diamond Dyes. No spotting or streaking, never a trace of that red-dyed look. Just rich, even, bright colors that hold amazingly through wear and washing. Diamond Dyes are the highest quality dyes you can buy because they go in in pure solution. That's what makes them so easy to use. That's what they've been famous for 50 years. Cent packages—all drug stores.

Diamond Dyes

Highest Quality for 50 Years

had sheltered her all her life. It had sometimes seemed a prosaic town to Gay; now, in comparison with a bewildering and unexpected future, it looked dear and friendly. Almost, she was sad to leave it. The grass of the common was so gaily green, topped by tender, uncurling leaves of elm trees that had stood there for a century. Blossoming orchards sloped to the quiet river; and everywhere was the sweet scent of spring.

Gay's hand tightened, and Nick covered it with his own.

"Homesick—already?" he questioned gently.

Gay shook her head as they began the descent of the long hill.

"No, Nick. I wasn't homesick, exactly; but it looked so natural; and what we're doing is so amazing. Why, even an hour ago I didn't dream."

She stopped, as if it were difficult to express his thought; and Nick continued: "That before the sun was noon-high you'd be starting on your honeymoon? Well, Gay, we're both in the same boat. I don't wonder you feel a little dazed. I'm dazed myself; but you're not to feel 'homesick'—shant let you. I tell you what, young lady, we're lucky to live within forty miles of a state where we can get a license and be married all in an hour."

"And how I've scorned the people who have done it!"

Gay flushed hotly at the memory; but Nick only smiled as he admitted: "Same here, old girl. We never know when we're going to be the other foot, do we? But there's one thing I'll wager a bride never did before, Gay, and that's to start off on her honeymoon with her goods and chattels tied up in a bandanna."

He spoke so seriously that for a moment Gay forgot the look he had given her when they started. She wondered, with a little chill at her heart, if Nick would rather she'd have come to him as well, as most girls would have come. With that, perhaps, something in his that revolted at what might seem a lack of daintiness on her part. He didn't know what that red bandanna held!

"Nick," she began, as if she was just the most frightened, "did you think it wasn't nice of me to come this way?"

He turned to her, surprise written on his face. "Nice?—why—?" (he put his foot on the brake bringing the car almost to a standstill), "why shouldn't it be nice? I think it was bully of you, Gay. Do you know, after I left you I wondered just how we'd manage. I'm not such an idiot as to think you could travel as light as I can; but a suitcase—Well, I'll say, Gay, that when I saw you standing there, not keeping me waiting a minute, and with that bundle on your stick, I said to myself: 'You haven't made any mistake in your girl, old man. I wanted to cheer!'"

He loosened his hold on the brake so suddenly that Gay lost her balance, and reaching out he put an arm across her shoulders, keeping it there until they reached the level country once again. It seemed to the girl an action wholly brotherly. Even after his reassuring answer to her question, she wondered if Nick felt for her the least bit the way he ought to feel, if she were to be his wife.

Her own emotions she did not analyze. Nick was just Nick to her—the lines of his face she had never known. He was true blue. She could trust him forever and ever. Never could she love anybody else. That he had asked her to marry him out of a sudden impulse of his generous heart, she knew. Was she wronging him by her own impulsive yielding? Yet he had called her "his girl." . . .

(To Be Continued.)

Demonstrates Invention

Woman Has Contraption Which Will Revolutionize Marbles and Miniature Golf

Mrs. Niels, of Brighton Beach, New York, gave a demonstration of her new invention—a device which she hopes will soon revolutionize the game of marbles, the game of miniature golf, and the game of darning holes out of socks.

Mrs. Payne, who is 26, has a 9-year-old son who inspired the invention. The boy used to come in with holes in the knees of his stockings and while his mother sewed them up, this idea of revolutionizing things suddenly smote her.

Her invention looks like a cross between a bicycle and a gearshift lever. It has a knob at the top, attached to a rod which runs down through a cylinder. At the bottom of the cylinder is an opening, and a little nipper.

The marble player simply stands on his feet, clamps the thing down over a marble, gives the knob a wham with his hand and the marble shoots out. Any self-respecting boy who owned such a contraption would not stoop to shoot marbles.

Little Helos For This Week

"And this commendment have we from Him, that he who loveth God love his brother also."—John iv, 21.

Lowest thou dost to thou oughtest, then lowest thou dost likewise thy brethren:

One is the sun in the heaven, and one, only one is Love also.

Bears not each human figure the Godlike stamp on his forehead?

Readest thou not in his face thine own? Is he not sailing,

Loat like thyself on an ocean unknown; and is he not guided

By the same stars that guide thee? Why shouldst thou hate then thy brother?

Hatest he thee? forgive! for 'tis sweeter to stammer one letter

Of the Eternal's language,—on earth it is called Forgiveness.

—Blissed Tegner.

Therefore come what may, hold fast to love. Though men should rend your heart, let them not enslave or harden it. We win by tenderness, we conquer by forgiveness.

—Frederick William Robertson.

For years Thomas Graves' Worm Extremator has ranked as a reliable worm preparation and it always maintains its reputation.

Private Aerodrome For Prince Sandringham, the Royal residence in Norfolk, is to have a private aerodrome for the Prince of Wales and Prince George on the air visit.

If the final details of the plans now under consideration receive the King's approval, a hangar large enough to accommodate four planes will be erected on the estate, fronting on the Royal golf course.

Minard's Liniment for Chest Congestion.

The fisherman's prayer, says the St. Augustine Record is: "Lord, suffer me to catch a fish no larger than even I, when talking of it afterwards, may have no need to lie."

If you can't see the bright side polish up the dark one and look at it.

If baby has COLIC

ACRY in the night. Colic! No cause for alarm if Castoria is handy. This pure vegetable preparation brings quick comfort and can never harm. It is the "wonder" when children are ailing. Whether it's the stomach, or the little bowels; colic or constipation; or diarrhea. When tiny tongues are coated, or the breath is bad. Whenever there's no gentle regulation. Children need the taste of Castoria, and its mildness makes it safe for frequent use.

And a more liberal dose of Castoria is always better for growing children than strong medicine meant only for adult use.

Fletcher's CASTORIA

Feeding Laying Hens

Ten Year Average Cost Record Is Given By Experimental Station

The long-term average of the cost of feeding laying hens at the Lennoxville Experimental Station of the Dominion Department of Agriculture is \$2.43 per hen; which means that with eggs selling at an average of 35 cents per dozen it takes 6.99 dozen, or 81 eggs, to pay for the keep of the laying hen, eggs laid in excess of that number being profit.

Minard's Liniment has a hundred uses.

"Every Sunday we go fishing," complained the young wife, "and you know I hate fish."

"Well, said her husband, surveying the empty basket, "I catch as few as possible."

The unicorn fish wears a single horn.

WHY SUFFER FROM YOUR LIVER?

Why be handicapped with unrelenting blotches on the face, eyes, and blotches and that tired and languid feeling? This indicates a torpid liver. Headache, Dizziness and Biliousness surely follow. You must stimulate your liver, start the life flowing with Carter's Little Liver Pills.

They also act as a mild laxative, purely vegetable, free from calomel and poisonous drugs, small, easy to swallow, and not habit forming. They are not a purgative that causes or pains, unpleasant after effect following, on the contrary a good tonic. All Druggists 25c and 75c red packs.

A TRIUMPH FOR THE CHEVROLET! The Longest Auto Trip on Record.

Triumphing over fever, bandits, adverse weather conditions, and having blazed their own trail over thousands of miles of mountain and jungle country, two courageous Argentines, Adam and Andrew Stoessel, recently arrived in New York in their CHEVROLET SEDAN. They are the first men to pilot an automobile from Buenos Ayres to the United States. It took them two years and they used 6600 gallons of gasoline on their 19,000 mile jaunt, the 80-mile stretch between Cartagena, Colombo, and Colon, Panama, being the only part of the trip that the Auto did not cover by road.—The above is recorded by "The Automotive World."

Mebbe He's Right.

"What is a screen grid tube?" asked a radio fan of young Mr. Trapp, yesterday.
"Well, a screen grid tube," replied Heinrich, "is simply a tetrode, differing from a triode in that another electrode is added to regulate the electronic flow between anode and cathode."

Companies that Have Signed

On the list of companies that have signed contracts with the Alberta Wheat Pool to handle Pool wheat in their elevators are Alberta Pacific Grain Co., Federal Grain Ltd., Gillespie Grain Co., Searle Grain Co. All these companies have elevators in Stony Plain.

The A.W.P. Reduces Salaries

The directors of the Alberta Wheat Pool authorised a reduction of salaries of employees at their last meeting. The reduction affects married employees with salaries over \$150 per month and single employees with salaries over \$100 a month. The directors have accepted a reduction in their per diem allowance. All employees excepting the elevator agents come under this salary reduction.

Trying Year for Grain Co's.

How trying a period the past year has been for companies engaged in the grain business is very apparent from the sharp drop in operating earnings shown in the annual statement for the fiscal year ending July 31, just issued by the Reliance Grain and constituent companies. The year, President S. T. Smith stated in his remarks to the shareholders, has been one of the most difficult ever experienced, for not only did the company have to contend with nervous and erratic markets and a general lack of export demand, but the volume of handling, particularly in the company's country elevators, was too small to make even overhead expenses.

Open Seasons for Game

Following are open seasons for game—
Ducks and Geese—Sept 16 to Dec 14th.
Hungarian Partridge—Oct 1 to Nov. 14.
Prairie Chicken—Oct. 1-15.
Pheasant—No open season.
Deer—Nov 1 to Dec 14.
Otter, Nov. 1 to May 1.
Beaver, No Open Season.
Muskrat—Between North Sask. River and Tp. 91, March 15 to April 30.
Game Licenses can be had at Sun Office, where copies of the Game Act can be seen.

Mr. Burford, Labor Leader.

Mr Chas. E. Burford, the well known labor leader, has been touring this district the past few weeks, visiting with friends and those known to be favorable to the Labor cause.

Mr Burford came originally from Chicago, where he had been president of the Public Ownership League; and he is at present the Alberta representative for this League. He is also the author of a number of books and pamphlets on Public Ownership, and presents many irrefutable arguments along this line. He is also an orator of some distinction, and made himself quite noticeable recently in Edmonton, when the proposal for light and power made by the Calgary Power company was before the Edmonton City council.

Altho an American, Mr. B. does not see wholly eye to eye with the American Federation of Labor, which organization he designates, in one of his books, as "this foreign outfit."

Mr. Werner's Trip

Mr. P. Werner resumed his business duties on Monday, on his return from a short visit to Vancouver, where he had formerly resided. An account of his trip may prove interesting to those who have had the pleasure of visiting the Coast city, altho the time devoted to the trip was all too short to admit of very extended observations. After completing his business with the immigration authorities, Mr. Werner had the pleasure of renewing acquaintances with some of his old friends. The weather was a very pleasant surprise, each day seeming to vie with the other in quantity of sunshine.

It might be worthy of mention that, in spite of the increased tariff protection given by the Bennett Government, Macintosh apples are going out at a much lower price than last year, indicating that the growers are not disposed to use the tariff to impose on the consumer.

The lumber industry on the Coast is suffering, owing to the high American tariff; but indications are not wanting that the consumer is benefiting, considerable building being in evidence, particularly in the better sections of the city.

Vancouver offers a number of charming prospects; Dunbar Heights, in Point Grey district, from its elevation of some 800 feet above sea level, affords a magnificent view in every direction—to the north over Burrard Inlet, and south to the mouth of the Fraser river and across the channel to Vancouver. West Vancouver was paid a visit to, but this suburb enjoys a somewhat isolated position, the ferry trip to the business centre taking 30 minutes.

Another place visited was Whitecliff, at the entrance to Howe Sound, from where a fine view can be had of the entrance to the Inside Passage leading up the Coast to Prince Rupert and beyond.

On their arrival at Vancouver, Mr and Mrs Werner were met by their son Gus, who is now living at New Westminster.

Here and There

(617)

One of the biggest game bars ever to be taken out of the Canadian Rockies has fallen to the gun of Angus McDermott, of Montreal, who has been hunting in the Kootenay Valley. It includes two deer, two Rocky Mountain goats, one moose, one elk, and one black bear. At the end of his trip he spent six days tracking a monster grizzly and with a team of men he would have had the limit of every animal possible to get which the law allows him.

Comprising the largest one-day movement of apples out of British Columbia this season, the Canadian Pacific Railway recently operated four special freight trains over the mountains, making a shipment of 113 carloads of McIntosh Reds to the Prairie Provinces and as far east as Kenora.

Riding moose across New Brunswick lakes and rivers is beginning to rate as the coming new craze, says Major McEwen, noted New York sport and magazine writer, who has been spending a Fall outing in the Miramichi and Saint John River districts. Up to the present the moose ridden have been cow moose but Rev. Thomas Travis, of Montclair, N.J., appears to be the first who has ridden a bull moose which was done by him on the Grand Lake, about 35 miles from Fredericton. Now other sportsmen are taking up the pastime and it begins to look as though sportsmen in New Brunswick will be getting the habit of crossing lakes and rivers on mooseback.

Officials of the World's Grain Exhibition and Conference to be held at Regina July 25 to August 6, 1932, report that farmers in the States of Minnesota and Kansas are keenly interested. Entries of both oats and corn from these states are to be expected at the Exhibition. Over \$200,000 is to be offered in cash prizes and in some classes as many as fifty prizes will be awarded. First prize for corn will be \$25,500 and first prize for oats, \$2,500.

Flag poles are found at their best and highest in British Columbia. Recently one was sent via the Panama Canal all the way by water, to the Toronto National Exhibition. It was 177 feet high, 31 inches in diameter at the base and 2 1/2 inches at the top. This young giant was 235 years old. The daddy of them all is at the famous Kew Gardens, London, England, and is 241 feet high.

This year's crop of grapes in the Niagara fruit peninsula between Hamilton and Niagara Falls, Ont., is expected to reach about \$5,000,000 pounds, an increase of 15 per cent. over the 1929 crop.

Motor tourist travel from the United States to New Brunswick has been 50 per cent greater this year than in 1922, according to statistics covering the season up to August 31, compiled by the provincial government from official returns gathered at the 25 ports of entry along the international boundary. The number was 35,531. Normal increase each year has been 25 per cent and the great difference this year is attributed to wider advertising by the provincial government.
